

# Alabama Bricks

This photographic listing includes bricks documented from Alabama along with those suspected to have been made in Alabama. Some of the suspected Alabama bricks were made by Harbison Walker (HW) and have been attributed to other states. Because HW had a major presence in Birmingham, all HW bricks found in Alabama are considered a possible Alabama brick in this presentation. Other bricks found in Alabama and not attributed to a specific State or company are also included in this listing until proven otherwise.

Always interesting in trading  
for new bricks
